This summary sheet provides information on tank mixes conducted with this product. Corteva Agriscience™ gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and use is at grower's risk.

Important Note: Do not use any tank mix if the mixture cannot be applied within the label recommendations for individual products or if specific tank mix restrictions apply.

Larger, more complicated mixes; unlisted mixes or replacing alternative products to those listed in this table are not endorsed. However, for further information or to register a tank mix request please contact your local Corteva representative or call the Hotline on 0800 689 8899.

Physical compatibility data is based on the results of an industry recognised standard test. Be aware that in the field, water hardness, pH, temperature etc. can vary. Biological compatibility data are based on a small number of field trials, Corteva Agriscience™ cannot warrant the efficacy of other tank-mix partners. Where only Physical Compatibility or Sprayable with Continuous Agitation is shown, Corteva Agriscience™ has no biological data regarding efficacy or crop safety and only has data on physical compatibility, so growers use these mixes at their own risk.

NOTES:

*AstroKerb in mixture with PGR fungicides, especially if the crop is under stress, may cause an additive PGR effect.

†Recommended mixing order X-change then AstroKerb then Architect (BASF information).

OSR Herbicides? Think Water

A VI Stewardship Scheme to build on existing good practice to protect water and avoid restrictions on some key oilseed rape herbicides

Steps that can be taken to reduce any potential issues include:

- Use [Wyby.co.uk](http://www.wyby.co.uk) to find out if any of your land is in a Drinking Water Safeguard Zone (DWSGZ)

- If you are farming in a DWSGZ, speak to your local water company catchment officer to understand the potential risk on a field-by-field basis, or speak to your agronomist.

- Implement best practice agronomy to help protect water. For propyzamide containing products please follow the advice given in the following VI information,

<https://voluntaryinitiative.org.uk/media/1077/propyzamide2016july.pdf>

CHANGES:

USE PLANT PROTECTION PRODUCTS SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.
