Avoid mixing with plant growth regulators and fungicides with plant growth regulation properties.

This summary sheet provides information on tank mixes conducted with this product. Corteva Agriscience™ gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and use is at grower's risk.

**Important Note:** Do not use any tank mix if the mixture cannot be applied within the recommendations for individual products or if specific tank mix restrictions apply.

Larger, more complicated mixes; unlisted mixes or replacing alternative products to those listed in this table are not endorsed. However, for further information or to register a tank mix request please contact your local Corteva representative or call the Hotline on 0800 689 8899.

Physical compatibility data is based on the results of an industry recognised standard test. Be aware that in the field, water hardness, pH, temperature etc. can vary. Biological compatibility data are based on a small number of field trials, Corteva Agriscience™ cannot warrant the efficacy of other tank mix partners. Where only Physical Compatibility or Sprayable with Continuous Agitation is shown, Corteva Agriscience™ has no biological data regarding efficacy or crop safety and only has data on physical compatibility, so growers use these mixes at their own risk.

**KEY:**

†Avoid mixing with fungicides with plant growth regulation properties as further crop shortening may be observed.

\*Add water conditioner to spray tank first. Product mix is supported by De Sangosse - please contact them for further information and details.

\*Product mix supported by ADAMA.
