This summary sheet provides information on tank mixes conducted with this product. Corteva Agriscience™ gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and use is at grower's risk.

Important Note: Do not use any tank mix if the mixture cannot be applied within the label recommendations for individual products or if specific tank mix restrictions apply.

Larger, more complicated mixes; unlisted mixes or replacing alternative products to those listed in this table are not endorsed. However, for further information or to register a tank mix request please contact your local Corteva representative or call the Hotline on 0800 689 8899.

Physical compatibility data is based on the results of an industry recognised standard test. Be aware that in the field, water hardness, pH, temperature etc. can vary. Biological compatibility data are based on a small number of field trials, Corteva Agriscience™ cannot warrant the efficacy of other tank mix partners. Where only Physical Compatibility or Sprayable with Continuous Agitation is shown, Corteva Agriscience™ has no biological data regarding efficacy or crop safety and only has data on physical compatibility, so growers use these mixes at their own risk.

KEY:

*Do not exceed total dose of florasulam

** Boxer + Atlantis OD or equivalents - Corteva Agriscience support safety and efficacy on cleavers <150mm. No support for efficacy on grass weeds.

*** Topik is only supported biologically when used in two way mixes.

*Carfentrazone can lead to poorer control of cleavers

†Max dose supported in these mixes with Boxer is 75 mls/ha.

‡Add BlueN to the spray tank last, when the tank is full of water to allow for maximum dilution.

Do not mix any of the following with Boxer: Attribut, Monitor, Eagle, Chekker.

CHANGES:

22 August 2025: New list

29 August 2025: Added BlueN

28 October 2025: Added Hurricane SX, Liberator, Luxinum Plus, Octavian Met, and Tower mixes, Added Sven insecticide, Added Lentyma SX, Librax, Monkey, Revystar XE

USE PLANT PROTECTION PRODUCTS SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.

This summary sheet provides information on tank mixes conducted with this product. Corteva Agriscience™ gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and use is at grower's risk.

Important Note: Do not use any tank mix if the mixture cannot be applied within the label recommendations for individual products or if specific tank mix restrictions apply.

Larger, more complicated mixes; unlisted mixes or replacing alternative products to those listed in this table are not endorsed. However, for further information or to register a tank mix request please contact your local Corteva representative or call the Hotline on 0800 689 8899.

Physical compatibility data is based on the results of an industry recognised standard test. Be aware that in the field, water hardness, pH, temperature etc. can vary. Biological compatibility data are based on a small number of field trials, Corteva Agriscience™ cannot warrant the efficacy of other tank mix partners. Where only Physical Compatibility or Sprayable with Continuous Agitation is shown, Corteva Agriscience™ has no biological data regarding efficacy or crop safety and only has data on physical compatibility, so growers use these mixes at their own risk.

KEY:

*Do not exceed total dose of florasulam

*Carfentrazone can lead to poorer control of cleavers

†Max dose supported in these mixes with Boxer is 75 ml/ha.

‡Add BlueN to the spray tank last, when the tank is full of water to allow for maximum dilution.

CHANGES:

22 August 2025: New list

29 August 2025: Added BlueN

28 October 2025: Added Hurricane SX, Liberator and Tower mixes, Added Sven insecticide, Added Lentyma SX, Librax, Monkey, Revystar XE
