

BULB VEGETABLES

PEST TIMING CALENDAR

Corteva Agriscience™ offers an outstanding lineup of customer-focused products for onion and garlic growers that fit well into an Integrated Pest Management (IPM) program.

Delegate™

Jemvelva™ active

INSECTICIDE

Delegate™ insecticide with Jemvelva™ active (spinetoram) is a naturally-derived product that is fast-acting against suppressing both leek moth and thrips. Its unique mode of action provides a strong rotational partner in IPM programs.

Entrust™

Qalcova™ active

INSECTICIDE

Entrust™ insecticide with Qalcova™ active (spinosad) is a proven natural insecticide for organic bulb vegetable growers. Entrust provides suppression of both leek moth and thrips in your onion, garlic and shallot crops while being kinder to beneficials and pollinators when used according to the product label.

Success™

Qalcova™ active

INSECTICIDE

Success™ insecticide with Qalcova™ active (spinosad), made from naturally occurring soil bacteria, has helped generations of farmers responsibly produce abundant and safe food. Success provides suppression of both leek moth and thrips in your bulb vegetable crops.

Fontelis™

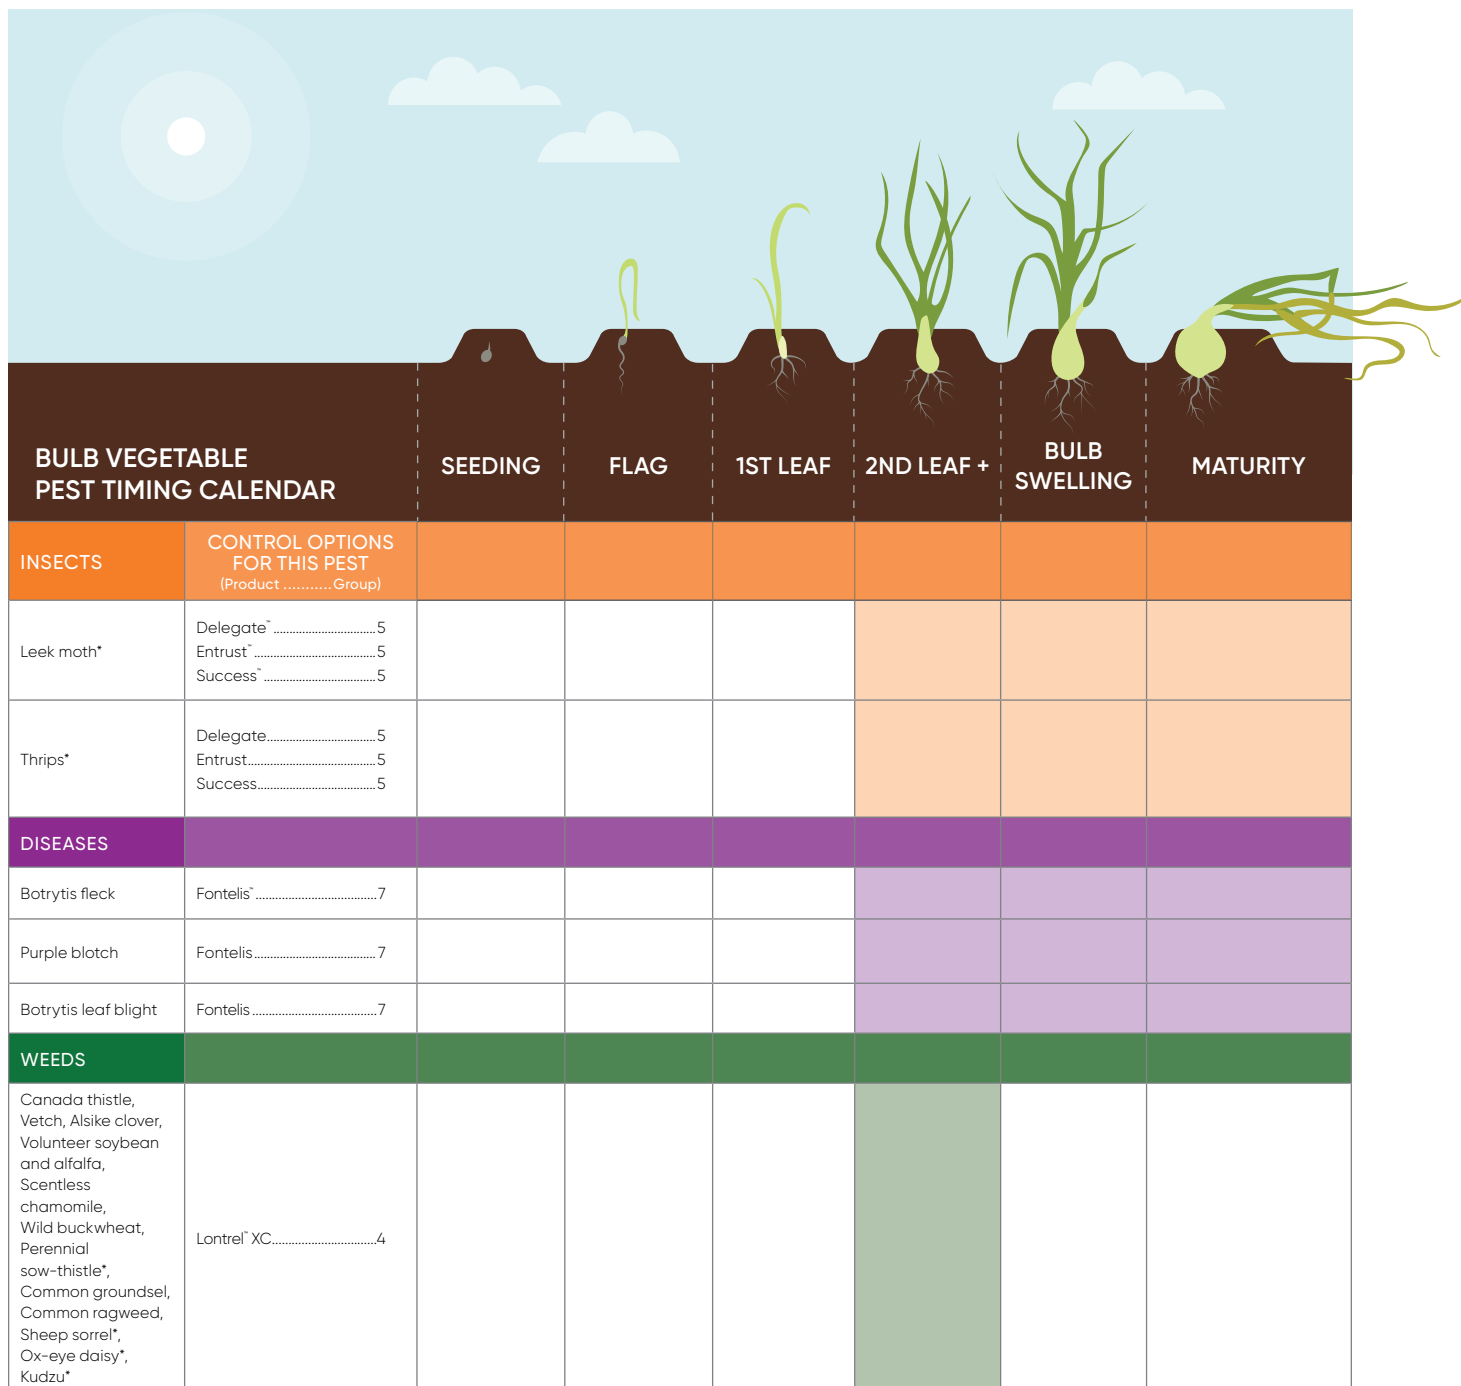

FUNGICIDE

Fontelis™ fungicide single mode of action allows for flexible application timing and disease management against key diseases such as botrytis fleck, purple blotch and botrytis leaf blight. With both translaminar and systemic protection, Fontelis redistributes within the plant to protect both the treated and untreated parts of the plant.

PRE-HARVEST INTERVALS IN BULB VEGETABLES

(Refer to each product label for crop specific pre-harvest intervals)

Delegate™ insecticide	3 days	Entrust™ insecticide	3 days	Success™ insecticide	3 days
Fontelis™ fungicide		3 days	Lontrel™ XC herbicide	45 days	

* Suppression
