

Revulin[®] Q

HERBICIDE

Confidence in Postemergence Weed Control

Active Ingredients

Nicosulfuron + Mesotrione

Modes of Action

Group 2 + Group 27

Rates (per acre)

Recommended: 3.4 – 4 oz

Maximum: 4 OZ (0.036 lb nicosulfuron + 0.092 lb mesotrione)

Labeled Crops

Field Corn, Field Seed Corn, Silage, Sweet Corn, Yellow Popcorn

Crop Rotation Interval*

Corn (field, seed, sweet, yellow popcorn)	0
Cereals (winter)	4m
Cereals (spring)	8m
Alfalfa, canola, cotton, sorghum, soybeans	10m

m - months | d - days

*Refer to label for full details.

Lasting Weed Control

- Controls more than 50 of the toughest grass and broadleaf weeds including crabgrass, fall panicum, foxtails, lambsquarters, johnsongrass, ragweed, pigweed, and woolly cupgrass
- Provides postemergence and residual weed control
- 2 Effective modes of action - Nicosulfuron (Group 2) and Mesotrione (Group 27)

Formulation

- Convenient, dry-flowable formulation
- Multiple modes of action for dependable weed control
- Proven crop safener for excellent crop safety under more conditions and across more corn types

Tank-Mix Partners

- Tank-mix flexibility with a variety of herbicides like Keystone[®] NXT herbicide, Resicore[®] REV herbicide and atrazine
- Include a crop oil concentrate (COC) or a high surfactant oil concentrate (HSOC) in the tank-mix
- Improved resistance management from the tank-mix flexibility

Application Flexibility

- Labeled for use across many corn hybrids and specialty types including yellow popcorn
- Added crop safener allows for application across diverse weather conditions
- Rainfast in 4 hours
- Can be applied to field corn up to 20-inches tall or V6 growth stage
